GCSE Maths Booster Programme

CONFIDENCE / PROBLEM-SOLVING / EXAM READINESS

Programme aims

01 Problem-solving

Maths is problem-solving. Rather than treating it as an extra challenge at the end, we put it at the centre of every workshop. Through deep investigation, teamwork and collaboration, students build confidence, intrinsic motivation and the mathematical tools they need along the way.

02 Procedural fluency

Secure fluency and competence in key GCSE concepts, identified through question-level analysis (QLA) of mock examination papers and our own diagnostic quizzes.

Programme at a glance

- 5 Workshops
- 5 Online sessions
- 3 Exam-special webinars
- 24 Students
- 3 Teachers

£300 per student

Based on a 24-student programme

The impact

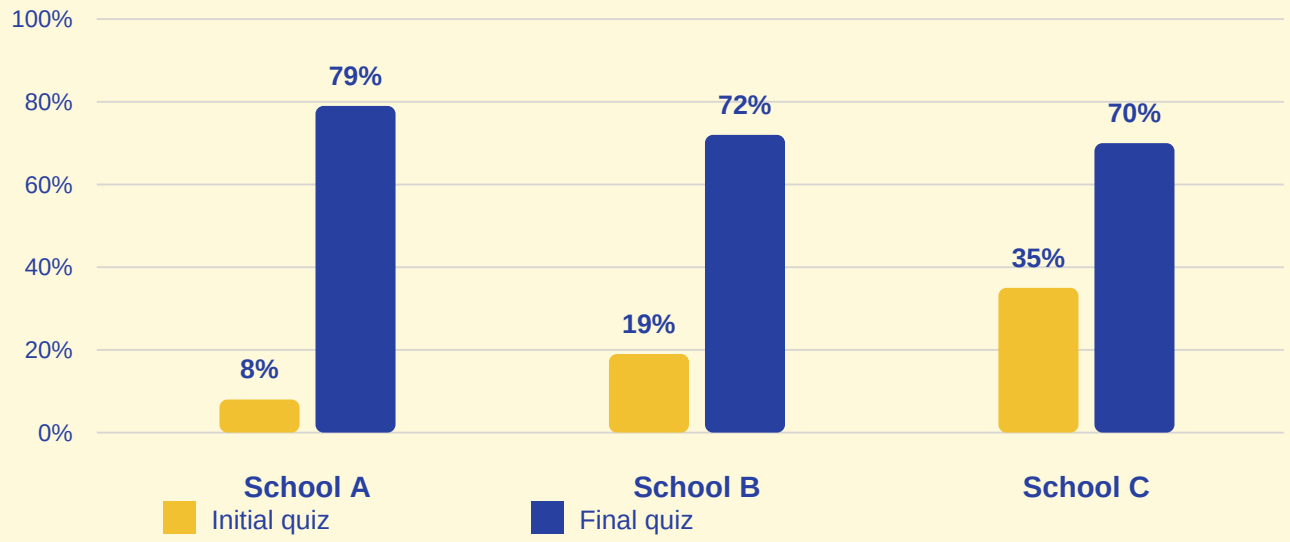

Evidence from three school programmes, 2025

A whole grade of progress

From March mocks to GCSE examinations

Progress on diagnostic quizzes

Average scores increased across all three schools on quizzes covering selected GCSE Maths topics.

In students' words

> *"I loved these sessions. I enjoyed how we covered subjects deeper and the competitive atmosphere."*
>
> School C student

> *"I enjoyed the competitiveness of all the challenges and I love the points. I liked how everyone had to understand so we were all learning together."*
>
> School B student

> *"I liked how we all got time to work together to find out the answers and when asked a question there was enough time given to process and understand the question to answer it."*
>
> School A student
